

PROPECTIN™ THE ULTIMATE *body filter*

Every day, you wake-up ready to face whatever life throws your way. But what about all those invisible toxins you are unknowingly exposed to? And where do they come from anyway? As it turns out, there isn't just one source. Consider cell phones, smog, pesticides, processed foods, and stress, just to name a few. Even your own body can produce toxins. Many cannot be seen, smelled, tasted, heard, or felt, yet these 'silent killers' can build up in your tissues over time and linger even decades after contamination. Even if they don't cause a disease or lead to radiation poisoning, they can prevent your body from functioning optimally.

The longer you wait to detoxify your body, the longer the ill effects could accumulate. Reclaim your health with **ProPectin™**—a great-tasting dietary supplement made from pure, pharmaceutical-grade apple pectin. The benefits of taking apple pectin are many. In fact, its effectiveness has been *clinically shown*.* Once consumed, **ProPectin™** immediately absorbs, binds with heavy metal particles, and helps to safely flush them from your body. As a matter of fact, for nearly two decades, apple pectin has been used by people living in the shadow of the 1986 Chernobyl nuclear catastrophe to help fight radiation poisoning.

Other pectin products are only 8–12% pure and often contain fillers. It takes 250 kilos of only the highest quality apples to make one kilo of **ProPectin™**. A six-step refinement process turns this powerful, raw apple pectin into a concentrated powder that mixes quickly in water. And get this—**ProPectin™** is the only pharmaceutical-grade apple pectin product on the market that is soluble for instant and maximum absorption. Not to mention that **ProPectin™** is delicious and tastes like mild apple nectar when mixed in water.

ProPectin™ is the only product endorsed by Dr. Michael Nobel—co-founder of the Nobel Charitable Trust and relative of Alfred Nobel, founder of the Nobel Prizes.
